## **Silver Predator Announces Private Placement**

**Reno, Nevada, July 10, 2014: Silver Predator Corp. (TSX.V:SPD)** (the “Company”) has arranged a non-brokered private placement of 19,000,000 common shares at \$0.07 per share for proceeds of \$1,330,000.

Till Capital Ltd. (TSX.V:TIL) has agreed to subscribe for the shares and is an insider and control person of the Company, as defined by the TSX Venture Exchange. This share issuance and the increase in the size of the control position were previously approved by a vote of the Company’s shareholders on February 21, 2014. On completion of this financing Till is projected to own 62,677,674 shares, or approximately 63.70% of the Company’s issued and outstanding shares.

The shares issued are subject to a hold period expiring four months plus one day from the date of issuance. The proceeds from the private placement will be used to further the Springer tungsten mine, the Taylor silver-gold deposit and for general working capital purposes.

### **Silver Predator Corp.**

Silver Predator’s corporate mandate is to advance its Springer Tungsten Mine and Mill Complex in Nevada to production through a joint venture arrangement. A preliminary PEA completed on current resources of 355,000 Indicated tons at an average grade of 0.537% containing 190,635 STU's of WO<sub>3</sub> and 1,933,600 Inferred tons at an average grade of 0.493% containing 952,326 STU's of WO<sub>3</sub> indicates an IRR of 47% after tax with an estimated capex of 29.8 million dollars<sup>(1)</sup>. The Springer facility was originally constructed and operated by General Electric Corp. in the late 1970’s and early 1980’s when the project was put on care and maintenance due to low tungsten prices<sup>(2)</sup>. The mill was modernized by Golden Predator Corp. in 2007-2008. The facility could be production capable within 12 months of a capital commitment. Approximately \$100 million dollars has cumulatively been invested by all companies in the construction and modernization of the mine and mill.

The Company also holds the Taylor silver-gold project in Nevada. The Taylor project hosts a current resource estimate, is open to expansion, and is located in a district that has identified the potential for

discovery of additional silver and gold deposits.

Mr. Mark Abrams, CPG, a Qualified Person as defined by National Instrument 43-101 and a consultant for the Company, has reviewed, verified and approved disclosure of the technical information contained in this news release.

*1) National Instrument 43-101 Technical Report; Preliminary Economic Assessment of the Springer Tungsten Mine Pershing County, Nevada, by Associated Geosciences Ltd. dated December 31, 2013 (and effective August 20, 2012) filed on SEDAR. The preliminary economic assessment is preliminary in nature, it includes inferred mineral resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as mineral reserves, and there is no certainty that the preliminary economic assessment will be realized;*

*2) A historical resource estimate of 10.7 Mt at 0.45% tungsten is based on data and reports prepared by the previous operators, General Electric and Utah International Inc in 1984. The company has not completed the work necessary to have the historical estimate verified by a QP. The company is not treating the estimate as a current 43-101 defined resource and the historical estimate should not be relied upon. The property will require future exploration to substantiate these historic values.*
