SILVER PREDATOR CORP.

(An Exploration Stage Enterprise)

CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

THREE MONTHS ENDED AUGUST 31, 2011

Notice of Non-review of Interim Financial Statements

The attached interim consolidated financial statements for the three month period ended August 31, 2011 have been prepared by and are the responsibility of the Company's management and have been approved by the Board of Directors of the Company. The Company's independent auditor has not performed a review of these interim financial statements.

The accompanying notes are an integral part of these condensed consolidated interim financial statements.

1. NATURE OF OPERATIONS

Silver Predator Corp. (the "Company") was incorporated under the laws of the Province of British Columbia on June 1, 2006. The Company is in the business of exploring for and developing economically viable mineral resource deposits in the United States and Canada. The Company's current focus is to advance the exploration of its silver properties.

The Company's head office, principal address and registered and records office is the 11th floor, 888 Dunsmuir Street, Vancouver, British Columbia, Canada V6C 3K4.

The business of mining and exploring for minerals involves a high degree of risk and there can be no assurance that current exploration and development programs will result in profitable mining operations. The recoverability of amounts shown for mineral properties is dependent upon the discovery of economically recoverable reserves, receipt of necessary permits and regulatory approvals, the ability of the Company to obtain financing to complete project development and future profitable operations or sale of the properties.

2. BASIS OF PREPARATION AND FIRST-TIME ADOPTION OF IFRS

Statement of Compliance

These condensed consolidated interim financial statements, including comparatives, have been prepared in accordance with International Accounting Standards ("IAS") 34, "Interim Financial Reporting" using accounting policies consistent with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and Interpretations issued by the International Financial Reporting Interpretations Committee ("IFRIC").

The Company's transition date to IFRS is June 1, 2010. The rules for first-time adoption of IFRS are set out in IFRS 1, "First-time adoption of International Financial Reporting Standards". In preparing the Company's first IFRS financial statements, these transition rules have been applied to the amounts previously reported in accordance with Canadian generally accepted accounting principles ("CGAAP"). Historical results and balances have been restated under IFRS. These condensed consolidated interim financial statements should be read in conjunction with the Company's 2011 CGAAP annual financial statements, and in consideration of the disclosure regarding the transition from CGAAP to IFRS included in Note 12. Certain disclosures that are required to be included in annual financial statements prepared in accordance with IFRS are not included in these condensed consolidated interim financial statements.

Basis of Consolidation and Presentation

The condensed consolidated financial statements have been prepared on a historical cost basis except for certain financial assets that are measured at fair value. All dollar amounts presented are in Canadian dollars unless otherwise specified.

These condensed consolidated financial statements incorporate the financial statements of the Company and its controlled subsidiaries. Control exists when the Company has the power, directly or indirectly, to govern the financial and operating policies of an entity so as to obtain benefits from its activities. The consolidated financial statements include the accounts of the Company and its direct wholly-owned subsidiaries. All significant intercompany transactions and balances have been eliminated.

Use of Estimates

The preparation of financial statements in conformity with IFRS requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported revenues and expenses during the period.

Although management uses historical experience and its best knowledge of the amount, events or actions to form the basis for judgments and estimates, actual results may differ from these estimates.

The most significant accounts that require estimates as the basis for determining the stated amounts include the recoverability of receivables, valuation and depreciation of property, plant and equipment and mining interests, valuation of share-based payments, and recognition of deferred income tax amounts.

3. SIGNIFICANT ACCOUNTING POLICIES

a. Cash and cash equivalents

Cash is comprised of cash on hand. Cash equivalents consist of highly liquid investments that are readily convertible to known amounts of cash.

b. Investments

The Company has designated marketable securities as available-for-sale. Changes in fair values of available-for-sale assets are reflected in other comprehensive income (loss).

3. SIGNIFICANT ACCOUNTING POLICIES *(Cont'd…)*

c. Provision for environmental rehabilitation

The Company recognizes liabilities for legal or constructive obligations associated with the retirement of mineral properties and equipment. The net present value of future rehabilitation costs is capitalized to the related asset along with a corresponding increase in the rehabilitation provision in the period incurred. Discount rates, using a pre-tax rate that reflect the time value of money, are used to calculate the net present value.

The Company's estimates of reclamation costs could change as a result of changes in regulatory requirements, discount rates and assumptions regarding the amount and timing of the future expenditures. These changes are recorded directly to the related assets with a corresponding entry to the rehabilitation provision. The increase in the provision due to the passage of time is recognized as interest expense.

d. Impairment of tangible assets

At the end of each reporting period, the Company's assets are reviewed to determine whether there is any indication that those assets may be impaired. If such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment, if any. The recoverable amount is the higher of fair value less costs to sell and value in use. Fair value is determined as the amount that would be obtained from the sale of the asset in an arm's length transaction between knowledgeable and willing parties. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount and the impairment loss is recognized in profit or loss for the period. For an asset that does not generate largely independent cash flows, the recoverable amount is determined for the cash generating unit to which the asset belongs.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but to an amount that does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognized immediately in profit or loss.

e. Mineral properties

Costs directly related to the exploration and evaluation of mineral properties are capitalized once the legal rights to explore the mineral properties are acquired or obtained. When the technical and commercial viability of a mineral resource have been demonstrated and a development decision has been made, the capitalized costs of the related property are transferred to mining assets and depreciated using the units of production method on commencement of commercial production.

If it is determined that capitalized acquisition, exploration and evaluation costs are not recoverable, or the property is abandoned or management has determined an impairment in value, the property is written down to its recoverable amount. Mineral properties are reviewed for impairment when facts and circumstances suggest that the carrying amount may exceed its recoverable amount.

From time to time, the Company acquires or disposes of properties pursuant to the terms of option agreements. Options are exercisable entirely at the discretion of the optionee and, accordingly, are recorded as mineral property costs or recoveries when the payments are made or received. After costs are recovered, the balance of the payments received are recorded as a gain on option or disposition of mineral property.

f. Income taxes

Income tax expense comprises current and deferred tax. Income tax is recognized in profit or loss except to the extent that it relates to items recognized directly in equity. Current tax expense is the expected tax payable on taxable income for the year, using tax rates enacted or substantively enacted at period end, adjusted for amendments to tax payable with regards to previous years.

Deferred tax is recorded using the liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Temporary differences are not provided for the initial recognition of assets or liabilities that affect neither accounting or taxable loss, and differences relating to investments in subsidiaries to the extent that they will probably not reverse in the foreseeable future. The amount of deferred tax provided is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the balance sheet date.

A deferred tax asset is recognized only to the extent that it is probable that future taxable profits will be available against which the asset can be utilized. To the extent that the Company does not consider it probable that a deferred tax asset will be recovered, it provides a valuation allowance against that excess.

3. SIGNIFICANT ACCOUNTING POLICIES *(Cont'd…)*

g. Foreign exchange

The functional currency of the Company and each of its subsidiaries is the currency of the primary economic environment in which the subsidiary operates. The consolidated financial statements are presented in Canadian dollars, which is Silver Predator Corp's functional currency. The functional currency determinations were conducted through an analysis of the consideration factors indentified in IAS 21, *The Effects of Changes in Foreign Exchange Rates*.

Subsidiaries with a Canadian dollar functional currency record transactions in currencies other than the Canadian dollar at exchange rates prevailing on the dates of the transactions. At the end of each reporting period, monetary assets and liabilities denominated in foreign currencies are translated into Canadian dollars at the period end exchange rate while non-monetary assets and liabilities are translated at historical rates. Income and expenses are translated at the exchange rates approximating those in effect on the date of the transactions.

The financial statements of subsidiaries that have a functional currency different from that of Silver Predator Corp. are translated into Canadian dollars as follows: assets and liabilities – at the closing rate at the date of the statement of financial position, and income and expenses – at the average rate of the period. All resulting changes are recognized in other comprehensive income as cumulative translation adjustments.

h. Earnings (loss) per share

Basic earnings (loss) per share is computed by dividing net earnings (loss) available to common shareholders by the weighted average number of shares outstanding during the reporting period. Diluted earnings (loss) per share is computed similar to basic earnings (loss) per share except that the weighted average shares outstanding are increased to include additional shares for the assumed exercise of stock options and warrants, if dilutive. The number of additional shares is calculated by assuming that outstanding stock options and warrants were exercised and that the proceeds from such exercises were used to acquire common stock at the average market price during the reporting periods.

i. Financial Instruments

Financial assets

The Company classifies its financial assets into one of the following categories as follows:

Loans and receivables - These assets are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are carried at amortized cost using the effective interest method less any provision for impairment.

Available-for-sale - Non-derivative financial assets not included in the above categories are classified as available-for-sale. They are carried at fair value with changes in fair value recognized in other comprehensive income (loss). Where a decline in the fair value of an available-for-sale financial asset constitutes objective evidence of impairment, the amount of the loss is removed from accumulated other comprehensive income (loss) and recognized profit or loss.

All financial assets except those measured at fair value through profit or loss are subject to review for impairment at least at each reporting date. Financial assets are impaired when there is objective evidence of impairment as a result of one or more events that have occurred after initial recognition of the asset and that event has an impact on the estimated future cash flows of the financial asset or the group of financial assets.

Financial liabilities

The Company classifies its financial liabilities as other liabilities, carried at amortized cost using the effective interest method.

j. Stock-based compensation

The Company grants stock options to directors, officers, employees and consultants. The fair value of stock options is measured on the grant date, using the Black-Scholes option pricing model and is recognized over the vesting period of the related options. Consideration paid for the shares on the exercise of stock options is credited to share capital.

3. SIGNIFICANT ACCOUNTING POLICIES *(Cont'd…)*

k. Flow-through shares

Under the Canadian Income Tax Act, an enterprise may issue securities referred to as flow-through shares. These instruments permit the Company to renounce (i.e. transfer) the tax deductions associated with an equal value of qualifying resource expenditures to the investor. The proceeds from the issuance of flow-through shares need to be allocated between the offering of the flow-through shares and the premium paid for the implied tax benefit received by the investors as a result of acquiring the flow-through shares. The calculated tax benefit is recognized as a liability until the Company incurs the expenditures, at which point the liability is reversed and recorded as a tax recovery on the statement of loss. The Company records a deferred tax liability on the date that the expenditures are incurred. At the time of recognition of the deferred tax liability, an offsetting entry is made to tax expense.

New standards not yet adopted

In November 2009, the IASB published IFRS 9, "Financial Instruments, "which covers the classification and measurement of financial assets as part of its project to replace IAS 39, "Financial Instruments: Recognition and Measurement." In October 2010, the requirements for classifying and measuring financial liabilities were added to IFRS 9. Under this guidance, entities have the option to recognize financial liabilities at fair value through earnings. If this option is elected, entitles would be required to reverse the portion of the fair value change due to their own credit risk out of earnings and recognize the change in other comprehensive income. IFRS 9 is effective for the Company on January 1, 2013. Early adoption is permitted and the standard is required to be applied retrospectively. There will be no significant impact the Company upon implementation of the issued standard.

IFRS 10, 'Consolidated Financial Statements', requires an entity to consolidate an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Under existing IFRS, consolidation is required when an entity has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. IFRS 10 replaces SIC-12, 'Consolidation - Special Purpose Entities', and parts of IAS 27, 'Consolidated and Separate Financial Statements'.

IFRS 11, 'Joint Arrangements', requires a venturer to classify its interest in a joint arrangement as a joint venture or a joint operation. Joint ventures will be accounted for using the equity method of accounting whereas for a joint operation, the venturer will recognize its share of the assets, liabilities, revenue and expenses of the joint operation. Under existing IFRS, entities have the choice to proportionately consolidate or equity account for interests in joint ventures. IFRS 11 supersedes IAS 31, 'Interests in Joint Ventures', and SIC-13, 'Jointly Controlled Entities - Non-monetary Contributions by Venturers'.

IFRS 12, 'Disclosure of Interests in Other Entities', establishes disclosure requirements for interests in other entities, such as joint arrangements, associates, special purpose vehicles and off balance sheet vehicles. The standard carries forward existing disclosures and also introduces significant additional disclosure requirements that address the nature of, and risks associated with, an entity's interests in other entities.

IFRS 13, 'Fair Value Measurement', is a comprehensive standard for fair value measurement and disclosure requirements for use across all IFRS standards. The new standard clarifies that fair value is the price that would be received to sell an asset, or paid to transfer a liability in an orderly transaction between market participants, at the measurement date. It also establishes disclosures about fair value measurement. Under existing IFRS, guidance on measuring and disclosing fair value is dispersed among the specific standards requiring fair value measurements and in many cases does not reflect a clear measurement basis or consistent disclosures.

Amendments to Other Standards

In addition, there have been amendments to existing standards, including IAS 27, 'Separate Financial Statements', and IAS 28, 'Investments in Associates and Joint Ventures'. IAS 27 addresses accounting for subsidiaries, jointly controlled entities and associates in non-consolidated financial statements. IAS 28 has been amended to include joint ventures in its scope and to address the changes in IFRS 10, 11, 12 and 13.

4. INVESTMENTS

The Company holds securities in other companies as follows:

	August 31, 2011		May 31, 2011	
	Market Value	Cost	Market Value	Cost
Common shares in public companies	$ 1,050,000	$ 684,988	$ 1,350,000	$ 684,988
Warrants in public companies	-	-	-	315,012
	$ 1,050,000	$ 684,988	$ 1,350,000	$ 1,000,000

Accumulated other comprehensive income of $334,627 (May 31, 2011 – $586,571) is a result of the difference between original cost and fair value as at August 31, 2011.

5. PROMISSORY NOTES

On October 20, 2010, the Company sold its subsidiary, 1794298 Ontario Inc., the holding company of Eucan Minas S.A. de C.V. for the sum of $300,000. $100,000 was received in cash and the remaining $200,000 was in the form of a promissory note. The promissory note is non-interest bearing with the first $100,000 payment due May 31, 2011 (received) and the second $100,000 payment due May 31, 2012.

6. LONG-TERM INVESTMENT

In fiscal 2011, the Company acquired certain rights and mineral claims from Golden Predator Corp. ("Golden Predator"). The option was structured as a purchase of the shares of Fury Explorations Ltd. ("Fury Canada") by Silver Predator. The Company received 8.3% of the issued and outstanding shares of Fury Canada with a fair value of $900,000.

Title to mineral property interests involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyance history characteristic of many mineral property interests. The Company has investigated title to all of its mineral property interests and, to the best of its knowledge, title to all of its properties are in good standing.

Illinois Property

In June 2011, the Company entered into an option agreement to acquire a 100% interest in certain state of Alaska mining claims known as the Illinois property. As consideration for the option, the Company paid US$25,000 and issued 25,000 common shares. To exercise the option, the Company is required to, in stages, pay an additional US$750,000 and issue 375,000 common shares, and incur exploration expenditures of US$3,400,000 by December 13, 2015.

The property will be subject to a 2% net smelter royalty ("NSR") on precious metals and a 1% NSR on base metals. 1% of the 2% NSR may be purchased by the Company for US$3,000,000.

Beginning in 2016, the Company will pay US$100,000 per year as an advance royalty until commercial production is reached. These payments will be credited against future royalty payments.

8. RELATED PARTY TRANSACTIONS

The financial statements include the financial statements of Silver Predator Corp. and its subsidiaries listed in the following table:

Name of Subsidiary	Country of Incorporation	Proportion of Ownership Interest	Principal Activity
Silver Predator US Holdings Corp.	Nevada, USA	100%	Holding Company
Silver Predator Alaska Corp.	Alaska, USA	100%	Mineral exploration
PWH Nevada Inc.	Nevada, USA	100%	Mineral exploration
Silver Predator Canada Corp.	Yukon, Canada	100%	Mineral exploration
Fury Explorations (Mexico) S. de R.L. de. C.V.	Mexico	100%	Mineral exploration

Amounts paid to related parties were incurred in the normal course of business and measured at the exchange amount, which is the amount agreed upon by the transacting parties and on terms and conditions similar to non-related parties.

The Company paid or accrued management and consulting fees of $18,000 for the three months ended August 31, 2011 (2010 - $68,631) due to directors of the Company.

The Company has entered into a cost sharing arrangement with a company having common directors. Under the agreement, the Company is provided with the use of office space, office and administrative resources, as well as technical services in support of exploration activities, all on a cost recovery basis. The amounts due to related parties under the cost sharing arrangement, and in respect of staking and drilling costs invoiced directly to the related party totaled $1,161,322 (2010 - $Nil), are non-interest bearing, due on demand, and were paid subsequent to the period end.

Amounts due to related parties of $21,406 (2010 - $232,896) are non-interest bearing and due on demand.

9. SHARE CAPITAL AND RESERVES

a) Authorized share capital

Unlimited number of common shares without par value.

b) Stock options and warrants

The Company has a Stock Option Plan to provide an incentive to its directors, officers, employees and consultants. The maximum number of shares issuable under the Stock Option Plan may not exceed 15% of the shares outstanding and the maximum number of options granted to insiders of the Company may not exceed 10% of the shares outstanding. The exercise period of the options may not exceed five years from the date of grant. Vesting and the exercise price is as determined by the Company's Board of Directors and cannot be less than the market price of the Company's shares.

Stock options and share purchase warrant transactions are summarized as follows:

	Warrants		Stock Options	
	Number	Weighted average exercise price	Number	Weighted average exercise price
Outstanding, May 31, 2010	-	$ -	-	$ -
Granted	3,245,750	0.53	3,846,500	0.88
Exercised	(429,500)	0.50	-	-
Forfeited	-	-	(103,500)	0.81
Outstanding, May 31, 2011	2,816,250	0.54	3,743,000	0.89
Granted	-	-	202,500	0.75
Exercised	(32,000)	0.50	-	-
Forfeited	-	-	(740,500)	0.93
Outstanding, August 31, 2011	2,784,250	0.54	3,205,000	0.87
Exercisable	2,784,250	$ 0.54	383,750	$ 0.71

As August 31, 2011, incentive stock options and share purchase warrants were outstanding as follows:

	Number of shares	Exercise price	Expiry Date
Options	395,000	$ 0.50	September 14, 2015
	1,140,000	0.78	November 18, 2015
	1,487,500	1.05	April 4, 2016
	182,500	0.75	June 27, 2016
	3,205,000		
Warrants	2,134,250	$ 0.50	September 21, 2011
	500,000	0.55	September 29, 2011
	150,000	1.00	December 23, 2012
	2,784,250		

During the quarter ended August 31, 2011, the Company recognized stock-based compensation of $366,268 that was recorded in the statement of operations. The weighted average fair value of options granted was $0.48 per share.

The fair value of all compensatory options granted is estimated on grant date using the Black-Scholes option pricing model. The weighted average assumptions used in calculating the fair values are as follows:

	2011	2010
Risk-free interest rate	2.63%	-
Expected life	5.00 years	-
Volatility	85.13%	-
Dividend rate	-	-

10. SUPPLEMENTAL DISCLOSURE WITH RESPECT TO CASH FLOWS

Significant non cash transactions for the period ended August 31, 2011 include the Company issuing 325,000 common shares with a fair value of $251,500 for the acquisition of mineral properties.

There were no significant non cash transactions for the period ended August 31, 2010.

11. SUBSEQUENT EVENT

Subsequent to August 31, 2011:

a) 1,608,250 warrants with an exercise price of $0.50 were exercised for proceeds of $804,125, and 526,000 warrants with an exercise price of $0.50 expired unexercised;

b) 500,000 warrants with an exercise price of $0.55 expired unexercised.

12. FIRST TIME ADOPTION OF IFRS

As stated in Note 2, these consolidated financial statements are for the period covered by the Company's first interim condensed consolidated financial statements prepared in accordance with IFRS. The accounting policies in Note 3 have been applied in preparing the condensed consolidated financial statements for the period ended August 31, 2011 and 2010, the consolidated financial statements for the year ended May 31, 2011 and the opening IFRS statement of financial position on June 1, 2010, the "Transition Date".

In preparing the opening IFRS statement of financial position and the financial statements for the interim period ended August 31, 2011, the Company has adjusted amounts reported previously in financial statements that were prepared in accordance with CGAAP. An explanation of how the transition from CGAAP to IFRS has affected the Company's financial position, financial performance and cash flows is set out in the following tables. The guidance for the first time adoption of IFRS is set out in IFRS 1. IFRS 1 provides for certain mandatory exceptions and optional exemptions for first time adopters of IFRS. The Company elected to take the following IFRS 1 optional exemptions:

a) to apply the requirements of IFRS 3, Business Combinations, prospectively from the Transition Date;

b) to apply the requirements of IFRS 2, Share-based payment, only to equity instruments granted after November 7, 2002 which had not vested as of the Transition Date; and

c) to transfer all foreign currency translation differences, recognized as a separate component of equity, to deficit as at the Transition Date including those foreign currency differences which arose on adoption of IFRS.

Additionally, in accordance with IFRS 1, an entity's estimates under IFRS at the date of transition to IFRS must be consistent with estimates made for the same date under previous CGAAP. The Company's IFRS estimates as of June 1, 2010 are consistent with its CGAAP estimates for the same date.

TRANSITION DATE BALANCE SHEET

As a result of the adoption of IFRS, no adjustments were required to the transition date balance sheet. In addition, no adjustments were required to the August 31, 2010 balance sheet and the statement of loss and comprehensive loss for the three months ended August 31, 2010.

12. FIRST TIME ADOPTION OF IFRS *(Cont'd…)*

The reconciliation between CGAAP and IFRS consolidated balance sheet as at May 31, 2011 is provided below:

		May 31, 2011		
	Note	CGAAP	Effect of transition to IFRS	IFRS
ASSETS				
Current				
Cash and cash equivalents		$ 6,584,209	$ -	$ 6,584,209

Comprehensive loss for the period		$ (1,014,570)	$ 28,145	$ (986,425)

12. FIRST TIME ADOPTION OF IFRS *(Cont'd…)*

There are no significant differences between IFRS and CGAAP in connection with the Company's statements of cash flows for the period ended August 31, 2011 or the year ended May 31, 2011.

a) Deferred tax on mineral properties

Under CGAAP, the Company recognized future income taxes on temporary differences arising on the initial recognition of the acquisition of Fury Mexico (where the fair value of the asset acquired exceeded its tax basis) in a transaction which was not a business combination and affected neither accounting profit (loss) nor taxable profit (loss). IAS 12, Income Taxes ("IAS 12"), does not permit the recognition of deferred taxes on such transactions.

As of May 31, 2011, the Company derecognized the impact of all deferred taxes which had previously been recognized on the initial acquisition of mineral properties through transactions not considered business combinations and affecting neither accounting profit (loss) nor taxable profit (loss).

b) Functional currency

Under CGAAP, the Company determined whether a subsidiary was an integrated operation or a self-sustaining entity which determined the method of translation into the presentation currency. IFRS requires that an entity determine the functional currency of each subsidiary individually, prior to consolidation into the Company's presentation currency.

The Company determined that one of its subsidiaries, which had been classified as being integrated operations under CGAAP, had a functional currency other than the Canadian Dollar. Financial statements were translated under CGAAP using the temporal method (whereby monetary assets and liabilities are translated at the current rate and non-monetary assets and liabilities at historic exchange rates with gains or losses being charged to income). The functional currency of some of its subsidiaries is the local currency. Under IFRS, financial statements of the subsidiaries denominated in their respective functional currencies are translated into Canadian dollars using the current rate method (whereby all assets and liabilities are translated using the reporting date exchange rates with any gains or losses being recorded in equity).
